GERMANY_A Far East atmosphere in Munich

Located in the district of Obersendling, the prestigious building hosting the General Chinese Consulate in Munich, along with its outdoor area, has been impressively illuminated by a successful combination of GRIVEN and Hess luminaires.

The design of the outdoor space surrounding the General Chinese Consulate in Munich is supported by a sophisticated lighting concept, developed to meet the need to offer a distinguished appearance as well as a functional atmospheric lighting, while at the same time respecting the strict security requirements of the protected area. GRIVEN LED projectors in combination with Hess design luminaires have been capable of ensuring an attractive presentation of the exterior space enhancing the green areas as well as the building walls in an elegant warm shade of white.

FOCUS ON

NEW PRODUCT VERSIONS_Amber passion

Ready to be submitted to the North American CSA certification, both these newly developed versions of Micro-Dune MK2 and Micro-Clip MK2 are fitted with 3 RGBA full colour LEDs, which allow to obtain warmer shades in the colour mix composition as well as a suggestive, intensive golden tone for amazing emotional effects. Testifying once again GRIVEN's amazing customization capability, both these versions have been developed and manufactured in a record time to meet the rapidly changing lighting design requirements.

EXHIBITIONS & EVENTS

SWEDEN_ Waiting for "Lights in Alingsås"

We are proud to announce that GRIVEN will be among the technical sponsors of the 20th edition of the prestigious Lights in Alingsås Festival, which will be held from September 27th to November 3rd in the Swedish town.

Every year Lights in Alingsås attracts more than 85.000 visitors and this open air exhibition has become the largest lighting event in public spaces in Northern Europe. This Festival is an important meeting point for lighting designers, students and professionals who work with light and appreciate its infinite creative possibilities. The route of the 2019 lighting trail will start in Amanska Parken, and will be running through Nolhaga, a very popular English style public park located just outside Alingsås. The route will be illuminated by a series of creative light installations, forming a themed path marked by 7 different spots.

In cooperation with our exclusive distributor for Sweden, Fox Belysning AB, our lighting fixtures will be used by the Swedish lighting designers Cecilia Cronelid and Johanna Enger to artistically illuminate the spot n°6 on the lighting trail, named "The Source", according to this year's theme "Be the Light". Both internationally renowned lighting designers relying upon a long teaching experience, Cecilia and Johanna will also lead together a group of students at the workshops in Alingsås. Our Sales Manager in charge of the Northern countries, Giuseppe Dedola, will participate in the inauguration phase of the event along with our Swedish partner.

Ready to celebrate its 400th anniversary, Alingsås is preparing to host this fascinating event for the 20th time offering new... enlightening emotions!
